## Blood Donation Camp

Date: 05-02-2022

The blood donation drive organised by SSE Department of Civil Engineering, in association with Hindupur District Hospital received great support and response with as many as **87 students and faculty members** coming forward to donate blood. We thank the medical team from Hindupur District Hospital & all donors for helping us fulfill this noble endeavour.

## CIRCULAR

This is to inform all faculty members and students, the department of Civil Engineering organizing “**Blood Camp**” on 12<sup>nd</sup> March 2020 (Thursday). So, volunteers are being asked to give blood and help save people's lives.

### **Summary of the Event**

The department of civil Engineering hosted a one-day "Blood Donation Camp" on 12.03.2020 (Saturday) at 10.00 am to 04.00 pm in EPL laboratory. Dr.A.Senthil Kumar, Principal/SSE, was facilitated the event. The Blood Camp began precisely at 10:00 a.m. with the proper arrangements. All of the students and faculty members were invited to participate in the Blood Camp. For volunteer's registration, blood donor's personal detail such as name, father's name, age, address, telephone no., etc. is recorded and the questionnaire is given to donors to access their present and past health status. The purpose is to select a suitable donor whose blood will be safe for a recipient. Hemoglobin test has to be done in the blood donation camp itself and by the technician on duty before the donor is declared fit. Blood donor's hemoglobin level will be checked to ensure that he/she is not suffering from anemia and can safely donate a unit of blood. A medical officer asks the blood donor certain questions about his medical history to ascertain that blood donor is fit to donate blood and he will examine donors. Donor's weight, blood pressure, pulse and temperature are recorded. Only good health, mentally alert and physically fit individuals are accepted as blood donors. After donation, allow donor to sit in the refreshment area under observation and served with some light refreshments. Totally 75 volunteers were participated and donated the blood. The donors should be advised to remain in refreshment room for at least 15 minutes and should be advised to increase their water consumption during the day and refrain from smoking for half an hour. A hearty good-bye with a request to the donor to donate again after three months is destined to inspire a donor to become a regular donor.
