1.3.1 Institution integrates crosscutting issues relevant to Professional Ethics, Gender, Human Values, Environment and Sustainability in transacting the Curriculum

The institution's curriculum seamlessly incorporates important cross-cutting issues such as Gender, Environment and Sustainability, Human Values, and Professional Ethics, thereby promoting a comprehensive and value-based development of students. To achieve this objective, the college organizes a range of activities throughout the academic year that are integral to the curriculum.

While it is important to note that the university determines the syllabus which the college is required to follow, the college endeavors to prioritize and address the aforementioned issues within these limitations. In this regard, the college has implemented several measures, including the following:

1. Professional Ethics

Ethical practices such as truthful information, facts, and unprejudiced approach are taught in content of syllabus and certificate courses. Career Guidance and Placement Cell organized placement activities including training, development of students, aptitude test etc. on a regular basis as per the requirements of industry. The college also tries to foster professional and social ethics through Extra-Curricular activities aimed at nurturing the spirit of humanity and human values through social/community outreach programmes.
