## 4.1.1 Availability of adequate infrastructure and physical facilities viz., classrooms, laboratories, ICT infrastructure, facilities for cultural and sports activities, gymnasium, yoga Centre etc. in the institution

Sanskriti School of Engineering is committed to providing state-of-the-art infrastructure to enhance the academic, curricular, and co-curricular activities, ensuring a high-quality educational experience for the students.

The campus is Wi-Fi enabled, offering students access to e-learning resources for assignments and projects. ICT-enabled classrooms equipped with projectors allow for interactive teaching through PowerPoint presentations and video demonstrations, both by students and teachers, enhancing the learning experience in regular courses and club activities. The computer laboratory provides students with the necessary tools, including computers and projectors, for practical sessions, managed by a dedicated system administrator. Additionally, tutorial classrooms are available for conducting special classes as needed.

The library is well-stocked with a wide range of engineering books, continuously updated to align with the evolving syllabus and meet the needs of faculty and students. The management system ensures smooth book issuing and returns. The library also houses periodicals, journals, and reference volumes, maintained in excellent condition. Computers are available for faculty and students to access internet resources, enriching their research and study capabilities.

### **Class rooms:**

The classrooms at Sanskriti School of Engineering are designed to provide a conducive environment for learning. They are well-furnished, well-ventilated, and equipped with modern amenities to support the educational needs of students.

The classrooms are well-furnished with comfortable seating arrangements and desks for students. The furniture is ergonomically designed to ensure the comfort of students during long hours of sitting. The classrooms are also well-ventilated, with enough windows to allow natural light in and an effective air conditioning or ventilation system to regulate the temperature.

Audibility and visibility are given top priority in the classrooms. The rooms have good acoustics with the appropriate sound-absorbing materials and noise-reducing features to prevent sound from echoing or being absorbed. The teacher is also equipped with a microphone to ensure clear communication.

To ensure visibility, the classrooms at SanskrithiSchool of Engineering have a step-wise seating system. The arrangement allows all students to have a clear view of the whiteboard without any obstruction. The classrooms are equipped with modern whiteboards and markers, which are large enough to be visible to all students. The markers are also easily erasable, making it easy for the teacher to explain concepts and ideas.

Camera surveillance is available in all the classrooms to ensure the safety of students and property. The cameras are strategically placed to provide maximum coverage of the classroom. The classrooms also have fans and lights to provide comfort and visibility. The fans keep the room cool and comfortable, while the lights provide adequate illumination for learning.

Power backup availability is ensured in case of power outages to prevent any disruption to classes. The classrooms are equipped with generators and backup power systems to ensure that classes continue uninterrupted.

In summary, the classrooms at SanskrithiSchool of Engineering are well-furnished, well-ventilated, and equipped with modern amenities to support the educational needs of students. The emphasis on audibility, visibility, and safety makes these classrooms an ideal learning environment for students.

## Laboratories:

The laboratories at SanskrithiSchool of Engineering are designed and constructed as per the regulations set by the All India Council for Technical Education (AICTE). They are equipped with modern equipment and instruments that enable students to conduct experiments and learn practical applications of theoretical concepts.

The laboratories have a list of experiments displayed to guide students in their work. The list provides a clear outline of the experiments that students can perform in the lab, along with the

objectives, procedures, and expected outcomes. This ensures that students are well-prepared and have a clear understanding of what they are expected to accomplish.

Safety measures are taken and explained to the students before they start working in the lab. This includes providing appropriate safety gear such as gloves, goggles, and lab coats. The lab staff explains the importance of using safety gear and the potential hazards associated with each experiment. This ensures that students are aware of the potential risks and take necessary precautions to prevent accidents.

The laboratories are kept open beyond working hours to provide students with ample time to conduct experiments and complete their lab work. This benefits students who may need additional time to finish their work or who want to revisit the lab to conduct further experiments. Additionally, the extended hours provide students with the flexibility to work on their lab projects and assignments according to their schedule.

In summary, the laboratories at Sanskrithi School of Engineering are constructed as per the regulations set by the AICTE. They are equipped with modern equipment and instruments, and the list of experiments is displayed to guide students in their work. Safety measures are taken and explained to the students, and the labs are kept open beyond working hours to provide students with ample time to conduct experiments and complete their lab work. These measures ensure that students have access to the necessary resources and a safe learning environment to gain practical knowledge and skills.

## Digital Class rooms:

The digital classrooms at Sanskrithi School of Engineering are designed to enhance the learning experience by leveraging modern technology. There are four Digital classrooms. These classrooms are equipped with state-of-the-art equipment and software that enable teachers to deliver engaging and interactive lessons to students.

The digital classrooms are well-furnished with comfortable seating arrangements, ergonomic desks, and projectors. The projectors are connected to a central system that allows teachers to project educational content from a variety of sources, including laptops, tablets, and other digital devices.

The classrooms also have high-speed internet connectivity, enabling teachers to access online resources, multimedia content, and interactive tools for teaching. This allows students to have access to a wealth of information and resources that enhance their learning experience. In addition, the digital classrooms at SanskrithiSchool of Engineering are designed with a step-wise seating system that provides optimal visibility for all students. The classrooms are also equipped with modern whiteboards and markers that enable teachers to explain complex concepts and ideas effectively.

The digital classrooms are designed with power backup systems to ensure that classes are not disrupted during power outages. The classrooms also have air conditioning or ventilation systems that maintain a comfortable temperature for learning.

In summary, the digital classrooms at SanskrithiSchool of Engineering are well-equipped with modern technology that enhances the learning experience of students. The classrooms are equipped with software applications, high-speed internet connectivity, and multimedia tools that allow teachers to deliver interactive lessons. The classrooms are designed with optimal seating arrangements, modern whiteboards, and power backup systems that ensure a comfortable and uninterrupted learning environment.

## **Seminar Hall:**

The seminar hall at SanskrithiSchool of Engineering is a large and spacious venue designed to accommodate a significant number of people for various academic and co-curricular activities such as seminars, conferences, workshops, and guest lectures.

The seminar hall is well-furnished with comfortable seating arrangements that provide a conducive environment for attendees to listen and learn. The hall has a large stage that is equipped with modern audio and visual equipment, including microphones, projectors, and screens. This allows the presenters to deliver their presentations effectively and engage the audience with multimedia content. The hall is designed with proper acoustics to ensure that sound carries effectively to all parts of the venue, making it easier for attendees to listen to the presentations. The hall has modern lighting systems that can be adjusted to create a comfortable and suitable environment for different activities. This allows organizers to customize the lighting
