## 2017-18-Sai Prudent Exam

Sai Prudent Scholarship, the Non-Government scholarship program, is a testament to the commitment of Sanskrithi Group and Anahata Stiftung, Germany, in honor of the revered Bhagavan Sri Satya Sai Baba. This exceptional scholarship offers eligible students a life-changing opportunity to pursue their engineering education at SSE, completely free of cost for duration of four years.

To qualify for the scholarship, students must have successfully completed Class 12 with Mathematics, Physics, and Chemistry as their core subjects. The scholarship test follows an examination pattern similar to that of EAMCET, comprising 100 multiple-choice questions.

Today marked a significant day as aspiring students from various colleges across the Rayalaseema region convened at the esteemed Sanskrithi Group of Institutions in Puttaparthi to participate in the highly anticipated Sai Prudent Scholarship test. The response was overwhelming, with more than 1200 students from the region demonstrating their enthusiasm and determination to showcase their potential and secure this esteemed scholarship opportunity.

This scholarship program not only recognizes the academic excellence of these students but also reflects the unwavering commitment of Sanskrithi Group and Anahata Stiftung to empower and support talented individuals in their pursuit of higher education. The Sai Prudent Scholarship is a beacon of hope, inspiring deserving students to realize their dreams and make a positive impact in the field of engineering.

### ISRO - Industrial Visit Report

III B. Tech II Semester Students of CSE visited U.R.RAO Satellite Center on 08.07.2022. Dr. A. Senthil Kumar, Principal, SSE & Mr. Mahendra M HOD, Department of Computer Science & Engineering also joined with students. Dr. Srinivasan, Scientist, U.R.RAO invited cordially and took all students to seminar hall and shown how ISRO is grown from Aryabhata (India's first satellite, named after the famous Indian astronomer) to Gaganyaan (India's much-delayed maiden human spaceflight mission to space).

Dr. Srinivasan shown video how to design & implement Rocket and Satellite. Polar Satellite Launch Vehicle (PSLV) is the third generation launch vehicle of India. It is the first Indian launch vehicle to be equipped with liquid stages. After its first successful launch in October 1994, PSLV emerged as the reliable and versatile workhorse launch vehicle of India with 39 consecutively successful missions by June 2017. During 1994-2017 period, the vehicle has launched 48 Indian satellites and 209 satellites for customers from abroad.

Besides, the vehicle successfully launched two spacecraft – Chandrayaan-1 in 2008 and Mars Orbiter Spacecraft in 2013 – that later traveled to Moon and Mars respectively

Geosynchronous Satellite Launch Vehicle Mark II (GSLV Mk II) is the largest launch vehicle developed by India, which is currently in operation. This fourth generation launch vehicle is a three stage vehicle with four liquid strap-ons. The indigenously developed cryogenic Upper Stage (CUS), which is flight proven, forms the third stage of GSLV Mk II. From January 2014, the vehicle has achieved four consecutive successes.

Dr. Srinivasan shown & explained testing of Satellite in various phases such as Assembly, integration & test, Comprehensive assembly & test vacuum chamber, Comprehensive assembly and test vibration facility, Compact antenna test facility, ISITE Acoustic Test Facility, Space Science Instrumentation Facility.

### **A Report on Industrial Visit of III year ECE Students to "Amara Raja Electronics"**

**Date:** 23-02-2019

**Topic:** Industrial Visit to Amara Raja Electronics, chittoor

**No of students Attended:** 40

**Objective:**

Industrial visit has its own importance in a career of a student who is pursuing a professional degree.

To provide an excellent opportunity to interact with industries and know more about industrial environment

Industrial visits help them gain hands-on experience of how industry operations are executed. Industry visits bridge the gap between theoretical training and practical learning in a real-life environment.

The third year students of Electronics and Communication Engineering Department went to an Industrial visit to Amararaaj electronics, chittoor on 23<sup>rd</sup> February 2019. Total number of students was 40 and the students were accompanied by 2 faculty members. Mr. PRASANANJANEYA REDDY, Asst Professor – ECE  
Mrs. SWETHA, Warden, SSE Girls Hostel

#### FIRST LAUNCH PAD (FLP)

Then we were taken to FLP where we spent more than one hour. FLP was built in the early 1990s for the polar satellite launch vehicle. It has also been used for launching Geosynchronous satellite launch vehicle.

#### SECOND LAUNCH PAD (SLP)

Then we came across the second launch pad. SLP is state of the art launch complex and it is configured as a universal launch pad capable of accommodating all the launch vehicles of ISRO including the advanced launch vehicles to be built in the next decades.

#### SPACE MUSEUM

After visiting FLP & SLP we were finally visited the Space Museum. The history of Sriharikota and visual explanation of space orbit and also many of the miniature models of rockets.

#### ACKNOWLEDGEMENT

We would like to thank Dr. Mani Sir, Scientist D, ISRO for giving this opportunity to our college students. Also we thank Mr. Sudhir, Scientist Assistant, ISRO for accompanying with us during this visit and explaining various activities of FLP & SLP.

We render our sincere thanks to our college trustees and Dr. T. Venkatamuni, Principal of RVSPCET to arrange this industrial visit in a well manner.

## Mentor – Mentee system

A mentee can approach his / her mentor for both educational and personal guidance. It is conducted to help the students to strengthen their varied capabilities and to build an interpersonal relationship between the faculties and students. Sanskrithi School of Engineering highly focuses Mentor – Mentee system by maintaining department wise Counseling files and reflected in academic Time tables
