Affiliated by JNTUA & Approved by All India Council for Technical Education (AICTE), www.sseptp.org

Colour coded Dust bins:

In the Sanskrithi School of Engineering Campus, effective waste management is prioritized, and to facilitate this, color-coded dust bins have been introduced. The solid waste generated primarily consists of papers, answer sheets, and waste from kitchens and toilets. To promote sustainability and resource conservation, a waste paper recycling plant has been established. This facility converts waste paper into new papers, file covers, sheets, notepads, and other paper products.

To ensure proper waste segregation, dry and wet waste is collected separately in designated bins. The garbage collection is carried out twice a day to maintain cleanliness and hygiene on the campus. The kitchen waste is processed in a vermicompost plant, where it is converted into nutrient-rich compost. Garden waste such as weeds and leaves are deposited in organic pits to generate compost. The residual water from the vermicompost plant is collected in organic pits and utilized as a pesticide, promoting eco-friendly practices. Rainwater harvesting pits have been implemented to conserve rainwater, contributing to sustainable water management. Untreated waste is collected in specialized garbage disposal bins, and biomedical waste and lubricating oil discharged from generator sets are handled by government-approved vendors, ensuring proper disposal and adherence to environmental regulations.

To foster an environment of awareness and creativity among students, regular initiatives, such as "Wealth out of Waste" programs are conducted on campus. These activities encourage students to explore innovative ways to repurpose waste materials and promote a culture of recycling and upcycling.

Through the implementation of these measures, SSE showcases its commitment to sustainable waste management, resource conservation, and environmental responsibility. By raising awareness and actively involving students, the institution promotes a cleaner, greener, and more sustainable campus for the benefit of the entire college community.
