

Implementation of Energy-Efficient LED Lighting at SSE

Sanskriti School of Engineering (SSE) has made a significant transition to energy-efficient LED bulbs across various areas of the campus. LED bulbs offer remarkable energy efficiency when compared to conventional lighting options, consuming approximately 80% less energy than traditional light bulbs.

LED bulbs have been strategically installed in numerous locations throughout the college campus, ensuring proper lighting conditions while minimizing energy consumption. To enhance the lighting infrastructure, CFL bulbs have been replaced with LED bulbs of lower wattage, providing the same level of luminosity. This upgrade has been implemented not only in indoor spaces but also in streetlights and other areas of the campus that benefit from efficient lighting solutions.
