Ban on Single use of Plastic

Plastic pollution has emerged as a significant environmental concern, requiring urgent action. The excessive consumption and disposal of plastic have led to devastating consequences for our planet, as well as our health and well-being. Recognizing the need to address this issue, the government has launched a national campaign to ban the use of single-use plastics. Educational institutions, including Sanskrithi School of Engineering, have a crucial role to play in leading this nationwide endeavor.

Standard Operating Procedure for single use of plastic in SSE Campus

- Aim to achieve plastic-free campuses, with students and faculty actively participating in a mission mode approach.
- Prohibit the usage of plastics in canteens, shops within the institution's premises, and hostels.
- Students should refrain from bringing non-biodegradable plastic items to the institution.
- Encourage students to make their households plastic-free.
- Incentivize students to carry out similar campaigns at the community level.
- Install alternative facilities, such as water units, to eliminate the need for plastic water bottles.
- Ensure the availability of alternative solutions like cloth bags to replace plastic bottles, covers, and other goods on campuses.
- Organize events and poster competitions focusing on designing ecological and environment-friendly alternatives to minimize the use of single-use plastic.
- The management has taken the initiative to provide cloth bags to staff members, further supporting the plastic ban on campus.
